KEY: * Always Check With Airline R Regional Jet Carry On I International Flight Carry On
D U.S. Domestic Flight Carry On ** Non Padded - Padded Sleeve Recomendded

Airline Carry On

We designed our Airport line of carry on bags to maximize internal space while meeting airline carry on requirements. One way we do this is by using custom designed, telescoping handles that take up half the internal space of common roller handles.

Wheels

Our replaceable roller wheels use a specially formulated compound that maximizes durability while offering an ultra-quiet ride. These wheels glide smoothly on ABEC-5 rated sealed steel bearing hubs. The best wheels on any roller.

Armor

Think Tank rollers are protected in key locations by rails, skid guards and ultra-strong Hypalon panels. We attach many of our parts with real bolts (not rivets), making them easily replaceable for you road warriors out there.

Zippers

Like many things in life, there are good options, better options, and then there is the best. Our YKK® RC Fuse zippers are the highest quality option that YKK offers, providing superior durability and longevity — even under the toughest conditions.

Security

While a truly determined thief is hard to guard against, most thefts are crimes of opportunity. We include locks on most of our rolling bags that allow you lock the bag closed and also lock the bag to a fixed object. Next time you stop at a café, you can lock your bag to your table and lock the main compartment closed for peace of mind.
